

Structured Abstract Labels Research Dataset

Below are the 1,335 structured abstract labels used against the 2007 MEDLINE® Baseline file.

The list is sorted by:

Original Labels (27) denoted by an ‘X’ in the **O** column of the table;

Vetted Labels (66) denoted by an ‘X’ in the **V** column;

Enriched Labels (458) denoted by an ‘X’ in the **R** column; and the

Typographic and Punctuation Variant Labels (784).

The labels noted with an ‘X’ in the **E** column of the table are the *Valid Ending Labels* of which one was required to appear anywhere in the abstract text.

The labels noted with an ‘X’ in the **F** column of the table are the labels actually found in the abstract text (612).
