MetaMap Licensing

Because MetaMap makes extensive use of the [UMLS Metathesaurus](#), all use of MetaMap requires

1. Accepting the terms of the [UMLS Metathesaurus License](#), and
2. Creating a [UMLS Terminology Services \(UTS\) account](#).

Obtaining a UMLS License is free; please see [this page](#) for more information and instructions about how to proceed. UMLS License requests are typically processed within two weeks.

Note that UMLS licenses are issued only to individuals—not to groups or organizations, so course instructors planning to use MetaMap in an instructional setting must require that each student get a license.
