

DIAGNOSIS:  
Blood, see note.

NOTE: The patient's blood cells were studied under a microscope by the Department of Pathology. These tests were developed and their performance was determined by the National Laboratory of Blood Testing.

RELATED LABORATORY RESULTS:

Test Name	Collected	Result	Abnormal Range	Units	Specimen
WBC Count	01/01/2001	200.0	99.8-99.9	K/uL	XX ABC

CLINICAL INFORMATION:

Mr. Bat Man is a 29-year-old male from Gotham City, NY here for follow-up 6 months after chemotherapy and radiation. The patient has a history of ALS and is s/p TAH. These results are supportive of the patient's diagnosis of Stone Man's disease. Pt has one 3 year-old son, Timmy Tooth, who is alive and healthy. Mr. Bat Man is accompanied by his 29 yr old twin sister, Kat W. Man.

Allocate order to Protocol:99X9999
